## 1.7 Curriculum design principles

### Programme Rationale (summary)

The primary aim of the curriculum is to support new and aspiring teachers to become highly skilled, effective practitioners who incorporate evidence-informed practices within their day-to-day work. The qualification is designed to support the needs of both 'in-service' and 'pre-service' teachers by equipping them with the relevant knowledge, skills and behaviours associated with effective planning, teaching and assessment of learning, as well as developing their wider professional practices. The Initial Teacher Education (ITE) team work hard to ensure the differing needs of both in-service and pre-service teachers are acknowledged and supported, by promoting the use of 'communities of learning' and 'coaching approaches', alongside more traditional lessons, seminars and workshops.

### Context

The Level 4 Certificate in Education and Training curriculum reflects the most current and up to date industry practices. It has been designed alongside current education policy, research, and practices. The ITE team are actively engaged with multiple external organisations and bodies, including awarding organisations, Department for Education and Institute for Apprenticeships, which enables the team to keep abreast of changes in the sector. The ITE team also work closely with employers in the education sector, locally and nationally, to develop the curriculum and ensure currency of practice.

### Content

Through the following units the Level 4 Certificate in Education provides a structured and sequenced approach to enhancing your knowledge, skills and behaviours.

- Understanding Roles, Responsibilities and Relationships in Education and Training
- Planning to Meet the Needs of Learners in Education and Training
- Delivering Education and Training
- Assessing Learners in Education and Training
- Using Resources for Education and Training
- Teaching in a Specialist Area

### Teaching and Learning Strategy

The delivery approach adopted provides a good blend of academic study and practical application, exposing trainees to a broad range of teaching styles. All members of the ITE team have strong teaching backgrounds enabling them to build trainees' knowledge and skills by modelling evidenced informed principles within their own practice. A range of assessment formats are used to ensure all learning outcomes can be effectively evidenced. The ITE team work hard to develop supportive learning environments focused on developing trainees' 'self-confidence' and 'self-concept', both as teaching practitioners and independent Higher Education students. By embedding evidence-informed principles, the curriculum aims to deliver a comprehensive educational experience enabling trainees to become reflective, inspirational practitioners who proactively lead their own professional development, ensuring they remain at the forefront of innovative practice beyond their initial training year(s).

## **1.10 Preparation for Employment, further academic study and personal development**

By embedding evidence-informed principles, the curriculum aims to deliver a comprehensive educational experience enabling trainees to become reflective, inspirational practitioners who proactively lead their own professional development, ensuring they remain at the forefront of innovative practice beyond their initial training year(s). Similarly, all trainees are required to

evidence that they meet the Education and Training Foundation 'Professional Standards', which provide a framework for teachers and trainers to critically appraise their own practice and improve their teaching through Continuing Professional Development (CPD). Ensuring trainees adhere to these professional standards, alongside legislative requirements such as those outlined within the Equality Act (2010), helps support the development of responsible, respectful and tolerant practitioners. The development of trainees' subject pedagogy is also supported using additional mentor support and the use of targeted independent investigation. Additional 'transferable skills' developed within the curriculum that are useful to employers across a variety of jobs and industries include 'effective communication', 'working as part of a team', 'time management', 'organisation and management', 'critical thinking' and 'digital literacy'. It is also expected that initial teacher education programmes equip all trainee teachers with the skills to address the language, literacy and numeracy needs of their learners. To this end, minimum core standards are embedded and assessed throughout the curriculum.

## 1.11 UCSD Enterprise and Employability Framework Mapping

This section highlights any other areas of activity, signposting, or links to industry and employer standards.</p>						<p>Extra employability-related activity will be recorded on the Employability Activity Form.</p>

## 1.12 Student engagement in ongoing programme development

UCSD sees students as partners in their academic process, we actively seek and respond to your feedback at several points within the year. You and your course peers will elect a Student Representative to represent your views at Student Consultative Forum three times a year. The Lead Student Rep, elected by the whole student body also acts as a Student Governor in South Devon College's governance structures to represent your views. Students are also asked to give early and end of module review feedback to improve module delivery, and surveys about their student satisfaction once a year. In addition, students can always discuss any concerns or areas of good practice with their personal tutor.

Below, we outline the recent feedback that has been received from students and how we have developed the programme in response to that feedback.

<b>You said:</b>	<b>We did:</b>
Stay 5 minutes after for individual questions.	We have now timetabled a 30-minute session after each lesson for individual questions and tutorials.
More structured induction over a longer period of time.	We have re-developed our induction timetable to extend this period and include a wider range of information. We have also re-developed our Moodle pages to make the availability of information clearer.
There are not always books available in the library.	We have purchased a number more of our key texts and are continuously reviewing our reading lists to ensure we have the most current texts.
Unit amplification on each criteria is not clear.	All of the handbooks have now been updated to make this clear and these are also embedded in each of the blocks of delivery for assessment themes.
It is not always easy to book observations.	We have developed a single point of contact for booking of observations and developed an electronic form to ensure that this is received and actioned with 72 working hours.
