## Preparing for your programme

At UCSD, we understand that degree level study is a big step up from previous studies. To help prepare you for the degree we recommend engaging with preparatory activities. Each year UCSD organise step up to HE workshops, with a focus on supporting you to develop your research and writing skills, alongside academic techniques. For more information on the workshops and resources available, please visit our website: <https://www.ucsd.ac.uk/the-first-year-at-university/>.

The Student Support Hub is available throughout the duration of your programme and offers a range of services, acting as a first port of call for academic, study, wellbeing, disability, fees/funding, employability and progression support. When progressing to the next level of study of your higher education, there are also workshops and activities available to support you with progressing your graduate skills.

Preparatory reading is a great way to develop your knowledge and skills to be ready for the next level of study in higher education. Please see below some recommended reading to undertake prior to the start of your course:

### 4. Distinctive Features of the Programme and the Student Experience

At University Centre South Devon we offer a platform for students to achieve their goals here in the South West. Our curriculum is developed with employers to ensure that students develop graduate skills that the local employment market requires ensuring they play their part in the prosperity of South Devon, and beyond.

The success and well-being of every student is important to us. When they study with South Devon College, they'll be part of our community which is built upon a supportive culture of excellence. Because our programmes are delivered in partnership with University of Plymouth, they'll also be a member of their student body.

This results in an excellent learning environment that gives students every opportunity to excel. The numbers and statistics are evidence of this; we pride ourselves in consistently ranking above the national Higher Education benchmark in the National Student Survey. We work with students, and by sharing our passion for success and excellence we can help them achieve their goals.

While studying for a FdSc Sports Coaching and Fitness award, students will come to appreciate that coaching and fitness is best understood by adopting an integrated, multi-disciplinary approach. The programme is dynamic, examining a range of contemporary issues and subjects relating to the practice within the sports coaching and fitness industries.

Modules have been designed to provide a high quality education an intellectually challenging. This is supplemented with a suitable practical experience base, from which to develop the skills and attributes necessary in an ever changing work arena.

The programme incorporates current understanding about the demands on students, who may be managing multiple roles and may have arrived at their level study through many different routes of education and life experience. The course also takes a proactive approach to partnership working between tutors, students and employers.

The programme aims to enable an effective, efficient and enjoyable learning experience which is also a sound preparation for the workplace and for continuing individual and career development. Several modules are devoted to Personal and Professional Development, illustrating the importance of this type of development as part of the overall learning.

The programme will encourage an integrated learning experience; academic, information literacy, key skills and employability skills will all be developed alongside knowledge and intellectual skills. Integration of theory, practical and transferable skills development generates a dynamic approach to the curriculum, preparing graduates to be flexible and proactive in managing the changing needs of clients and employers within the framework of their own continuing growth. The need for a sound ethical and evidence base for working with people is addressed by developing reasoning, analytical and critical skills as well as the ability to select, organise and interpret complex information. Through the practice of presentation skills, students will learn to convey information clearly to others in appealing and accessible ways.

The programme is designed to help students to develop the knowledge, attitudes, attributes and skills needed by coaching and fitness employers. Students are pushed to develop research capabilities allowing progression into higher level undergraduate and postgraduate study and/or research. Programme development and design was therefore discussed with coaching and fitness professionals and providers is responsive to a broad range of careers and needs within the sector.

A key feature in this programme is a multi-disciplinary approach that will prepare students for career opportunities and further undergraduate study in a range of areas related to sport in its broadest sense. The learning approach is student centred, allowing each individual to bring their own unique personalities, beliefs and experiences into a framework of progressive development. The Programme Team will do their utmost to support and facilitate student learning and development to help them achieve their future aspirations.

To examine physiological factors that affect performance. Importance will be placed on the relationship of the cardio-vascular system, energy transport and metabolism alongside environmental factors that improve performance. The aim of the module is to build and develop principles/knowledge acquired in human anatomy and physiology to exercise science.

**Professional body minimum pass mark requirement:** N/A

#### **MODULE AIMS:**

Students will develop an understanding of how the body's systems contribute to a variety of exercise intensities. Through investigations they will understand how the body adapts to meet the demands of exercise.

**ASSESSED LEARNING OUTCOMES:** At the end of the module the learner will be expected to be able to:

<b>Assessed Module Learning Outcomes</b>	<b>Award/ Programme Learning Outcomes contributed to</b>
LO1: Analyse the relative contributions of the systems of energy to different intensities and types of exercise LO2: Investigate the cardio respiratory and cardio vascular responses to acute and chronic exercise LO3: Compare neuromuscular and hormonal responses to acute and chronic exercise LO4: Evaluate environmental influences on human performance	KU 1,2 & 3 CIS 1,2,3 & 4 KTS 1,2 & 4 ERS 3 & 4 PS 2& 3

- Aerobic & anaerobic
- ATP, ADP
- Krebs cycle
- Glycolysis and lactic acid

**Energy creation:**

- Coupled reaction
- Electron transport chain
- Endothermic and exothermic

**Maximal aerobic and anaerobic capacities:**

- Aerobic & anaerobic testing
- VO<sub>2</sub> max., O<sub>2</sub> uptake and consumption

**Respiratory factors in human performance:**

- Anaerobic threshold
- Blood acidity
- Inspiration
- Proprioceptors
- Respiratory muscles and tissue respiration

**Gas exchange in lungs:**

- Arteriovenous O<sub>2</sub> difference
- Bohr Effect
- Myoglobin
- O<sub>2</sub> diffusion and partial pressure.

**Fitness and well-being:** basal metabolic rates and fitness requirements through the life cycle

- Child to adult

**Summary of Module Content**

The module gives students an opportunity to link academic study with work experience; enhancing employability while also delivering assessed coursework that reflects on the development students make.

The module will provide you with a basic toolkit for identifying and securing appropriate work experience. However, it is up to you to find, apply for and secure your own work experience opportunities. You will consider how you develop your cultural capital, craft practice and understand your communities and landscapes of practice. Individual work opportunities, whether paid or unpaid, must be agreed with the module leader before you can proceed. This is to ensure that the work experience can be related to relevant areas or aspects of the sport/ coaching/ fitness industries.
